linkedin.com/in/lgnomar | github.com/LgnOmar
Algiers, Algeria

## Profile

Full-stack software engineer with strong interest in data engineering, intelligent systems, and applied artificial intelligence. Experienced in building end-to-end systems combining backend development, automation, and machine learning techniques.

## Research Interests

Graph-based recommender systems, representation learning for heterogeneous data, NLP (transformers and fine-tuning), evaluation of ML models in production environments, and responsible AI.

## Education

**University of Science and Technology Houari Boumediene (USTHB)** — Algiers, Algeria
*Professional Bachelor's Degree in Information Systems and Software Engineering (ISIL)* — *Expected 2026*

**National Higher School of Advanced Technologies** — Algiers, Algeria
*Preparatory Engineering Studies* — *2021 – 2022*

**Mohamed Chérif Benchabira High School** — Algiers, Algeria
*Baccalaureate in Mathematics (Grade: Very Good)* — *Jun. 2021*

## Experience & Experience

**SARL DisyDev** — Algiers, Algeria
*Software Engineer Intern* — *Oct. 2025 – Jan. 2026*

- Contributed to the development of a **PACS** (Picture Archiving and Communication System) for medical data management.
- Implemented and validated **DICOM** communication protocols to ensure standard medical imaging interoperability.
- Optimized backend performance for handling high-resolution medical image retrieval.

**Data Services (Travel Sector)** — Algiers, Algeria
*Data Automation Developer* — *July 2023 – Sept. 2023 | July 2024 – Sept. 2024*

- Developed automated scraping pipelines for travel agency using **Python** and **Selenium**.
- Processed large datasets using **Pandas**, exporting structured data to SQL databases.
- Reduced manual data entry workload by approx. 40% through script automation.

**Independent Projects** — Remote
*Full Stack Developer* — *Jan. 2022 – 2025*

- Architected **JibJob**, an intelligent gig-finding platform using **Flutter** and **Supabase**.
- Integrated an advanced Recommender System using **HGTConv** (Heterogeneous Graph Transformer) approach.
- Deployed scalable web applications using **Docker** and Linux environments.
- Managed end-to-end SDLC across multiple independent and client-facing full-stack projects (5+).

## Selected Projects

**JibJob Platform** | *Flutter, Supabase, Python, AI* — GitHub Link

- Developed a mobile-first intelligent platform connecting users with local gigs/jobs.
- Engineered a custom AI recommender system utilizing the **HGTConv** graph neural network approach.

**SQL SchemaLens** | *Python, Desktop App* — GitHub Link

- Created a lightweight, cross-platform desktop tool for offline analysis of SQL dump files.
- Enabled developers to visualize database structures and schemas without requiring a running server.

**Sentiment Analysis with BERT** | *Python, NLP, BERT* GitHub Link

- Implemented a Natural Language Processing model using BERT to classify text sentiment with high accuracy.
- Fine-tuned pre-trained transformers for specific dataset requirements.

**Real-time Face Detection** | *JavaScript, face-api.js* GitHub Link

- Built a browser-based computer vision application for real-time face landmark and expression detection.
- Optimized client-side performance to run smooth inference without backend latency.

## Technical Skills

**Languages:** Python , Java , C , C# , Dart , JS , SQL

**Web:** React , NextJS , Vue , Django , Tailwind

**Mobile:** Flutter

**Databases:** MySQL , Supabase , Firebase , Oracle

**Tools:** Docker , Linux , Git , GitHub

## Languages

**Arabic** – Native
**English** – C1 ( IELTS Academic - Full Professional Proficiency )
**French** – B2 ( Professional Working Proficiency )

## Certifications & Leadership

**Responsible Use of GenAI** | *AI Ethics & Safety* 2026

- Certified in the ethical implementation of Generative AI, focusing on bias mitigation and prompt responsibility.

**Project Management Professional Certification** | *MTF Institute (via Udemy)* 2026

- Successfully passed a professional assessment covering project lifecycle, risk management, stakeholder communication, and performance monitoring.
- Validated practical understanding of core project management principles aligned with industry best practices.

**Hackathon Organizer & Participant** 2023 – 2025

- Participant: **GDG Hack**, **Hackwave 1.0 & 2.0**.
- Active organizer for tech community events ensuring smooth logistics and team management.
- Demonstrated leadership in agile project delivery under time constraints.
